DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 21, 22, 27-31, 36, 38-41, and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Rozniecki.

Rozniecki discloses a hazardous control system for a hazardous material container 18 comprising a hazardous control material such as Halon, a breakable hazardous control material container 36 containing Halon within the container 36, the breakable container conform to a surface 36 of the hazardous material container 36.

3. Claims 21, 22, 23, 27-32, 36, 38-42, and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Bennet.

Bennet discloses a hazardous control system as shown in figures 1-9.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 24, 33, and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rozniecki.

Page 3

Application/Control Number: 09/920,179

Art Unit: 3752

Rozniecki teaches all the limitations of the claim except for the breakable container with materials that have different brittleness. It would have been obvious to one having ordinary skill in the art to have provided the device of Rozniecki with the breakable container with materials that have different brittleness, since to have the breakable container that have different brittleness is deemed to be an obvious matter of design choice.

6. Claims 25, 34, and 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rozniecki in view of Crouch.

Rozniecki teaches all the limitations of the claims except for a breaking element for breaking the container. However, Crouch discloses a container 36 for containing a hazardous control material 46, a breaking element 44. Therefore, it would have been obvious to one having ordinary skill in the art to configure the device of Rozniecki with a breaking element as suggested by Crouch. Doing so would provide an effective device (Crouch column 1, lines 28-30).

Allowable Subject Matter

7. Claims 26, 35, 37, 45, and 47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a hazard control system: Mikaila, and Childress et al.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q Nguyen whose telephone number is 703-305-0248. The examiner can normally be reached on Mon-Fri 6:30-4:00 alternate Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Mar can be reached on 703-308-2087. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
